DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1 – 22 and 65 - 69 are drawn to a semiconductor device, classified in class 257, subclass 777,
- II. Claims 23 – 64 are drawn to a method for manufacturing a semiconductor device, classified in class 438, subclass 106⁺.

The inventions of groups I and II are related as product made and process of making. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)).

In the instant case, the inventions are distinct each from the other because the device for cooling an integrated circuit as recited in Claim 1 could be made by employing a method that is materially altered from the process recited in Claim 23, in that the semiconductor device assembly could be made by placing discrete conductive elements over portions of the active surface of said first semiconductor device and resting said second semiconductor device upon said discrete conductive elements of said first semiconductor device instead of positioning a second semiconductor device upon said first semiconductor device and contacting at least some of discrete

Art Unit: 2811

conductive elements of said first semiconductor device with a backside of said second semiconductor device as recited in Claim 23.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Should Applicant elect Group I claims to be examined, Applicant is advised that this application is further restricted because it contains product Claims 1 – 22 and 65 – 69 directed to the following patentably distinct species of the claimed invention:

Embodiment 1 of Figures 1 and 10

Embodiment 2 of Figure 9

Embodiment 3 of Figure 11

Should Applicant elect Group II claims to be examined, Applicant is advised that this application is further restricted because it contains process Claims 23 – 64 directed to the following patentably distinct species of the claimed invention:

Embodiment 1 of Figures 2 - 8

Embodiment 2 of Figures 12 - 17

Embodiment 3 of Figure 18

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently no claim is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the

Art Unit: 2811

case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
